

MEETING EVALUATION, BSOM 2004

CLINICAL CASES

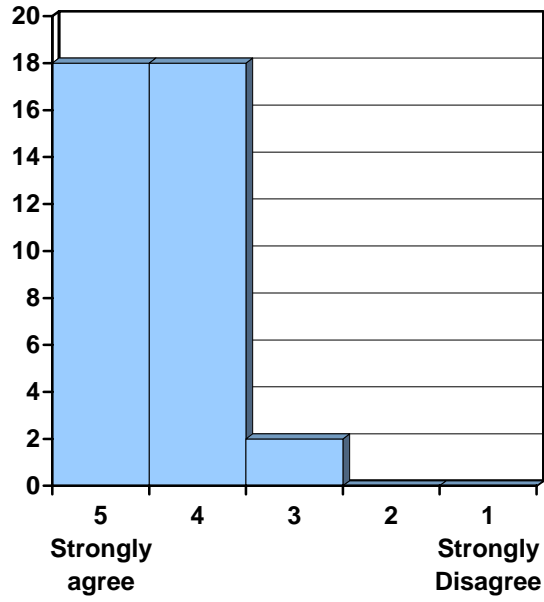

The meeting was relevant to my educational needs

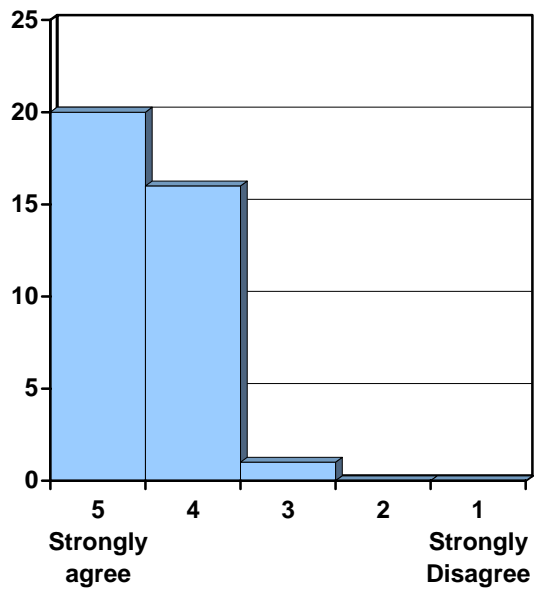

I learnt a great deal from this event

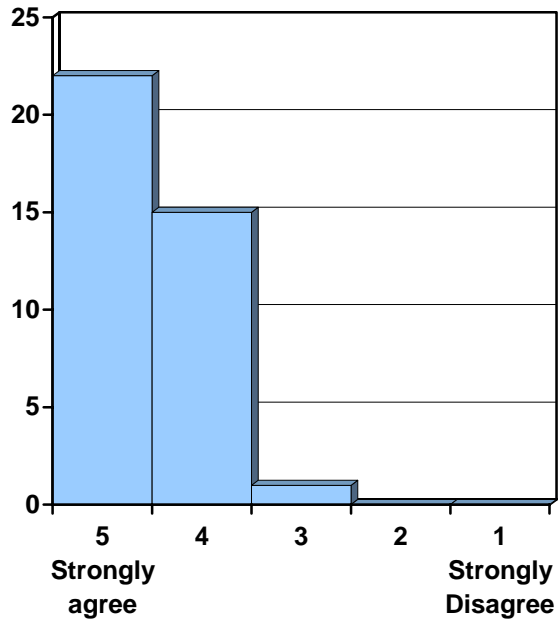

The meeting was very well structured

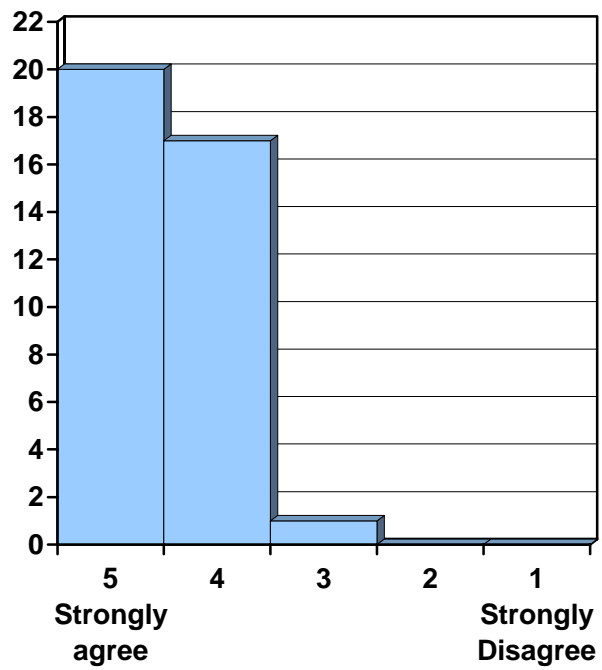

The speakers communicated effectively

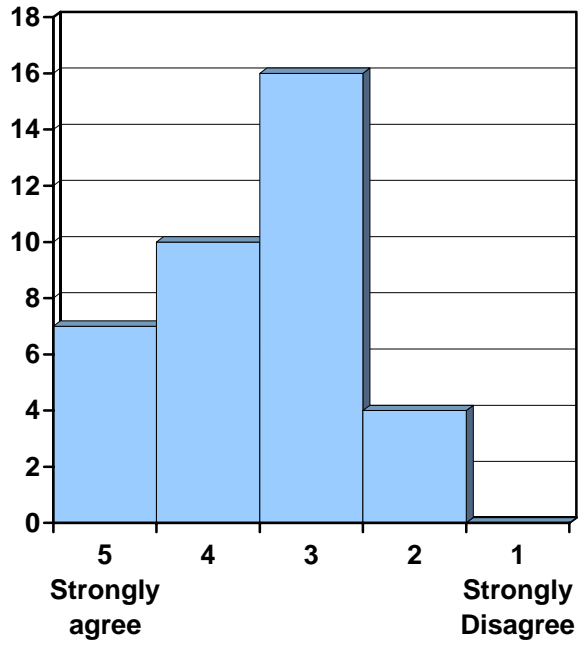

The information was well presented

There was sufficient time available for discussion

This meeting will change my clinical practice

MEETING EVALUATION, BSOM 2004

CLINICAL CASES

COMMENTS

1. Excellent venue and meeting Rheumatology very very good.
2. A vast improvement on the early days of the BSOM!
3. Very good to open up discussion
4. Many thanks, very useful
5. Very interesting
6. It would be useful if the cases have the same theme.
7. A very valuable part of the meeting. Thank you.
8. Well done for all the speakers
9. Very good
10. A theme would be a good idea maybe with invited speakers. Cases didn't really challenge the audience in terms of diagnostic or treatment dilemmas.
11. Case reports should be presented as PICO caries – the evidence based approach described in EBD journals.
12. Very good. Like different cases covering wider field. A theme may be ok but needs careful structuring.
13. Should look at joint meetings with BSOMP/BAOMS in future.
14. Excellent presentations. Extremely worthwhile meeting.
15. Possibly more structured and leading onto treatment protocols and effectiveness. Clinical cases on Friday morning and clinical science on Thurs p.m. Discussion of posters.
